3M™ Protecta® First™ Fall Protection

The First™ line of fall protection products from Protecta® were designed around a simple concept; provide a fundamental fall protection line with exceptional value. Utilising extensive research, the First™ line was assembled to provide fall protection in a wide variety of circumstances while maintaining a focus on value and safety. First™ offers all the necessary elements for a complete fall protection system and allows the user to choose components based on personal preference and job constraints. In addition to offering compliance, First™ is built with our quality and reliability, fall protection gear you can trust.

Selection. As simple as ABC.

A typical Personal Fall Arrest System (PFAS) incorporates three components often described as the ABC's of fall protection; The anchorage, body support and connectors.

A Anchorage

are a secure point of attachment. Anchorage connectors vary by industry, job, type of installation and structure. They must be able to hold fast under more than a ton of force generated in a fall.

Tie-off adaptor

- 2m length
 - Provides a fast & safe tie-off for your personal fall protection system
 - Max Arresting Force 6kN
 - Minimum Breaking Strength – 15kN
- 5900583A **\$23.90+GST**

B

Body Support

harnesses distribute fall forces over the upper thighs, pelvis, chest and shoulders. They provide an attachment point on the worker for the personal fall arrest system.
